

ARE BEDTIMES CULTURAL?

SMU REU 2026

A CROSS CULTURAL ANALYSIS OF INFANT BEDTIMES

CHARLOTTE LIN

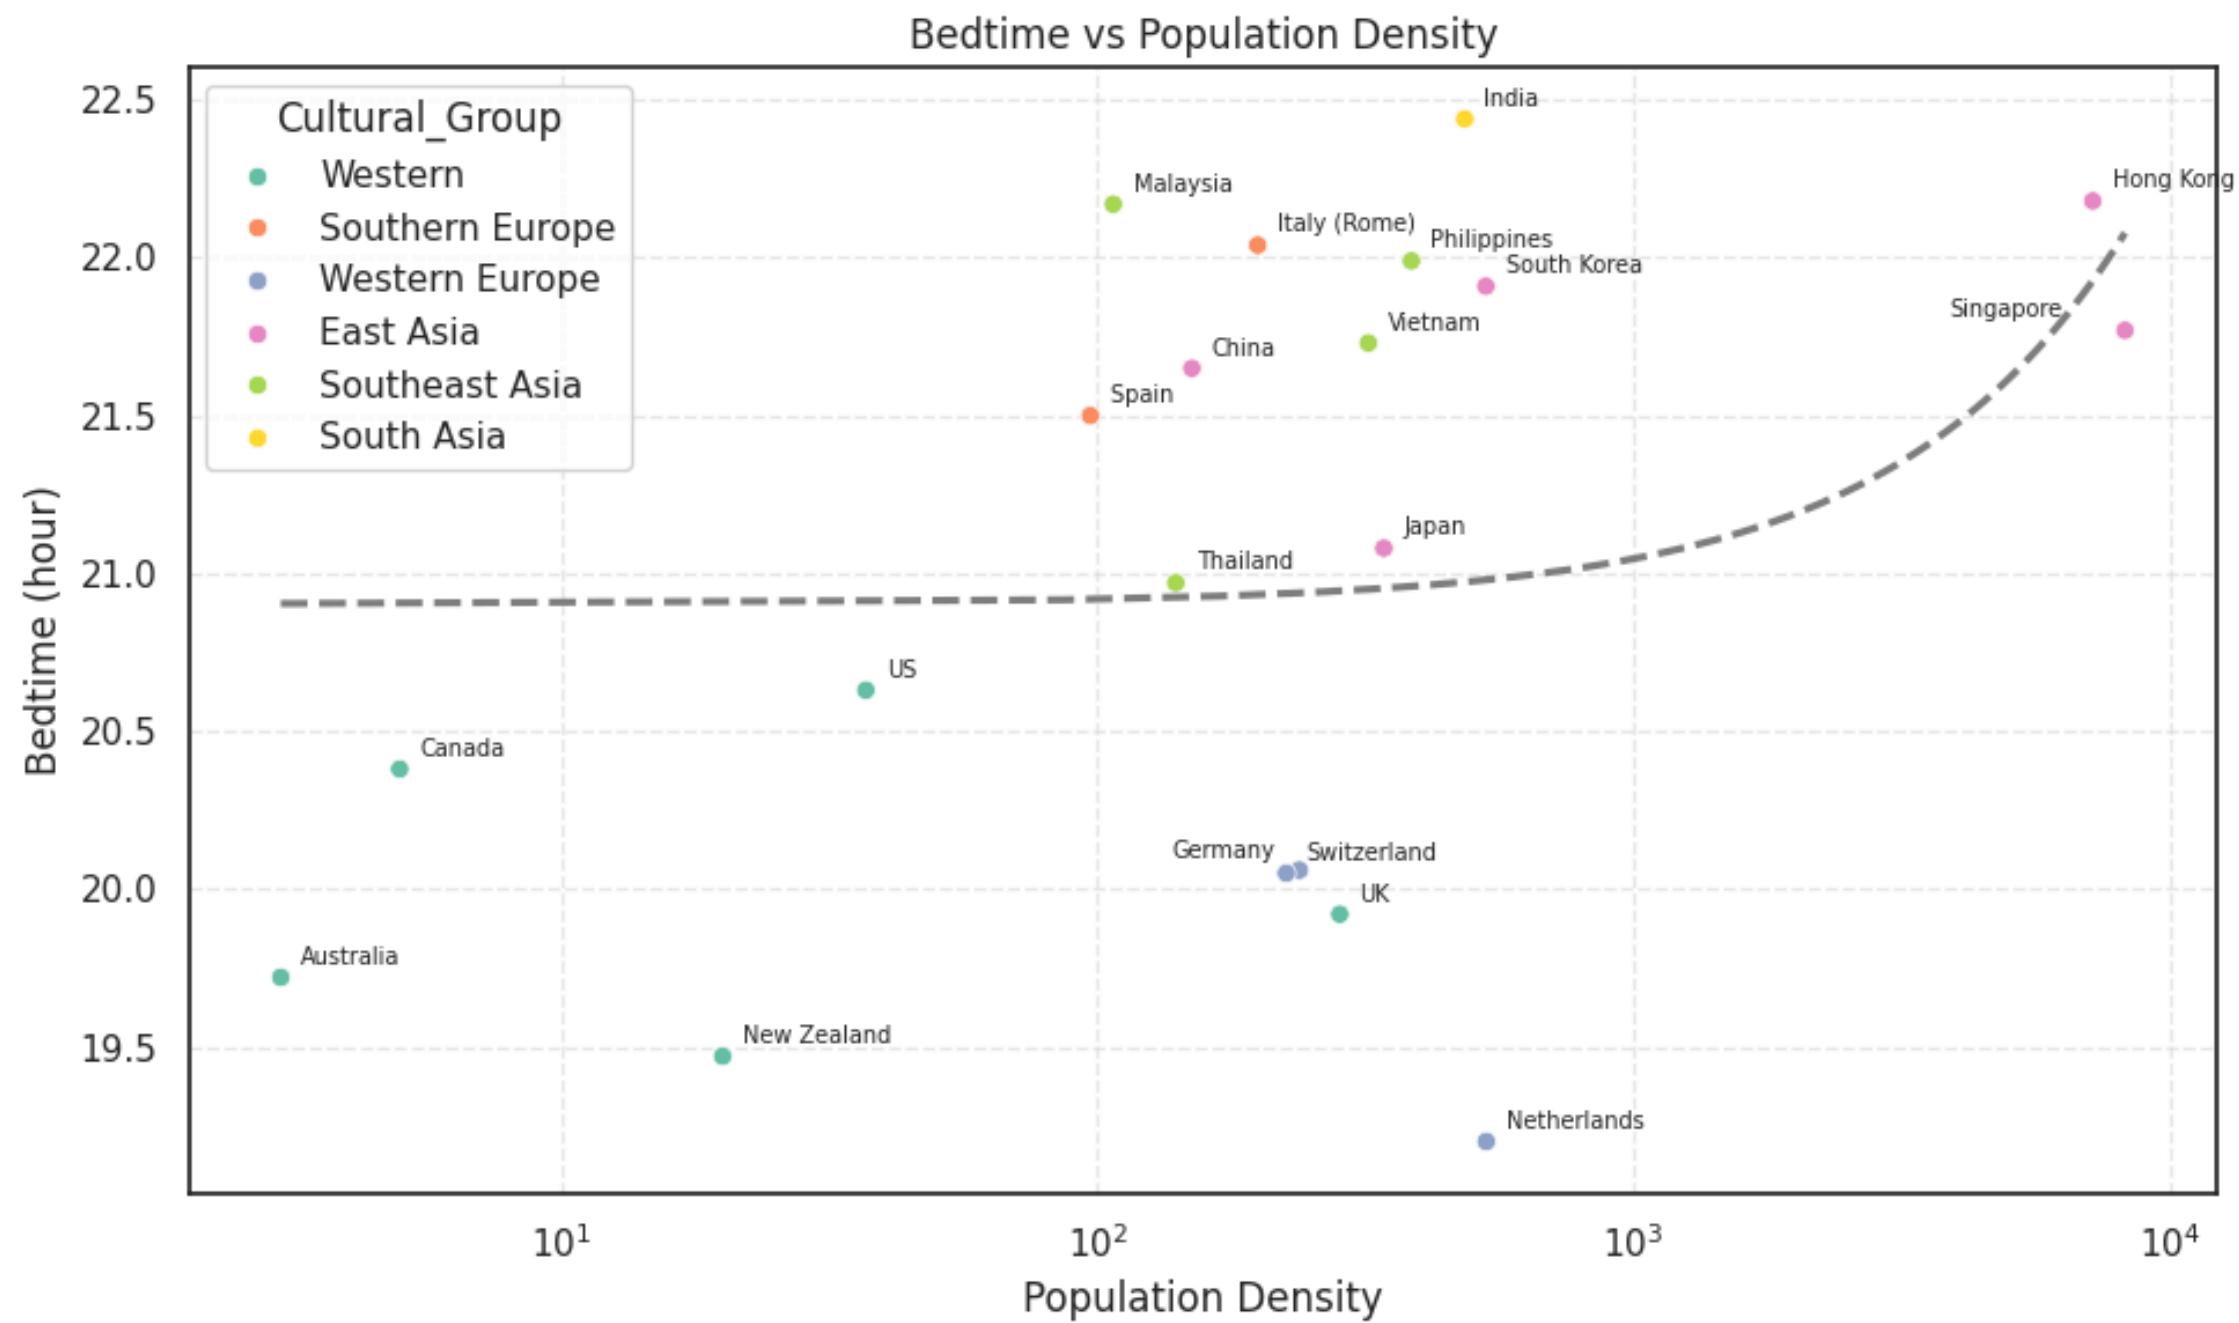

“

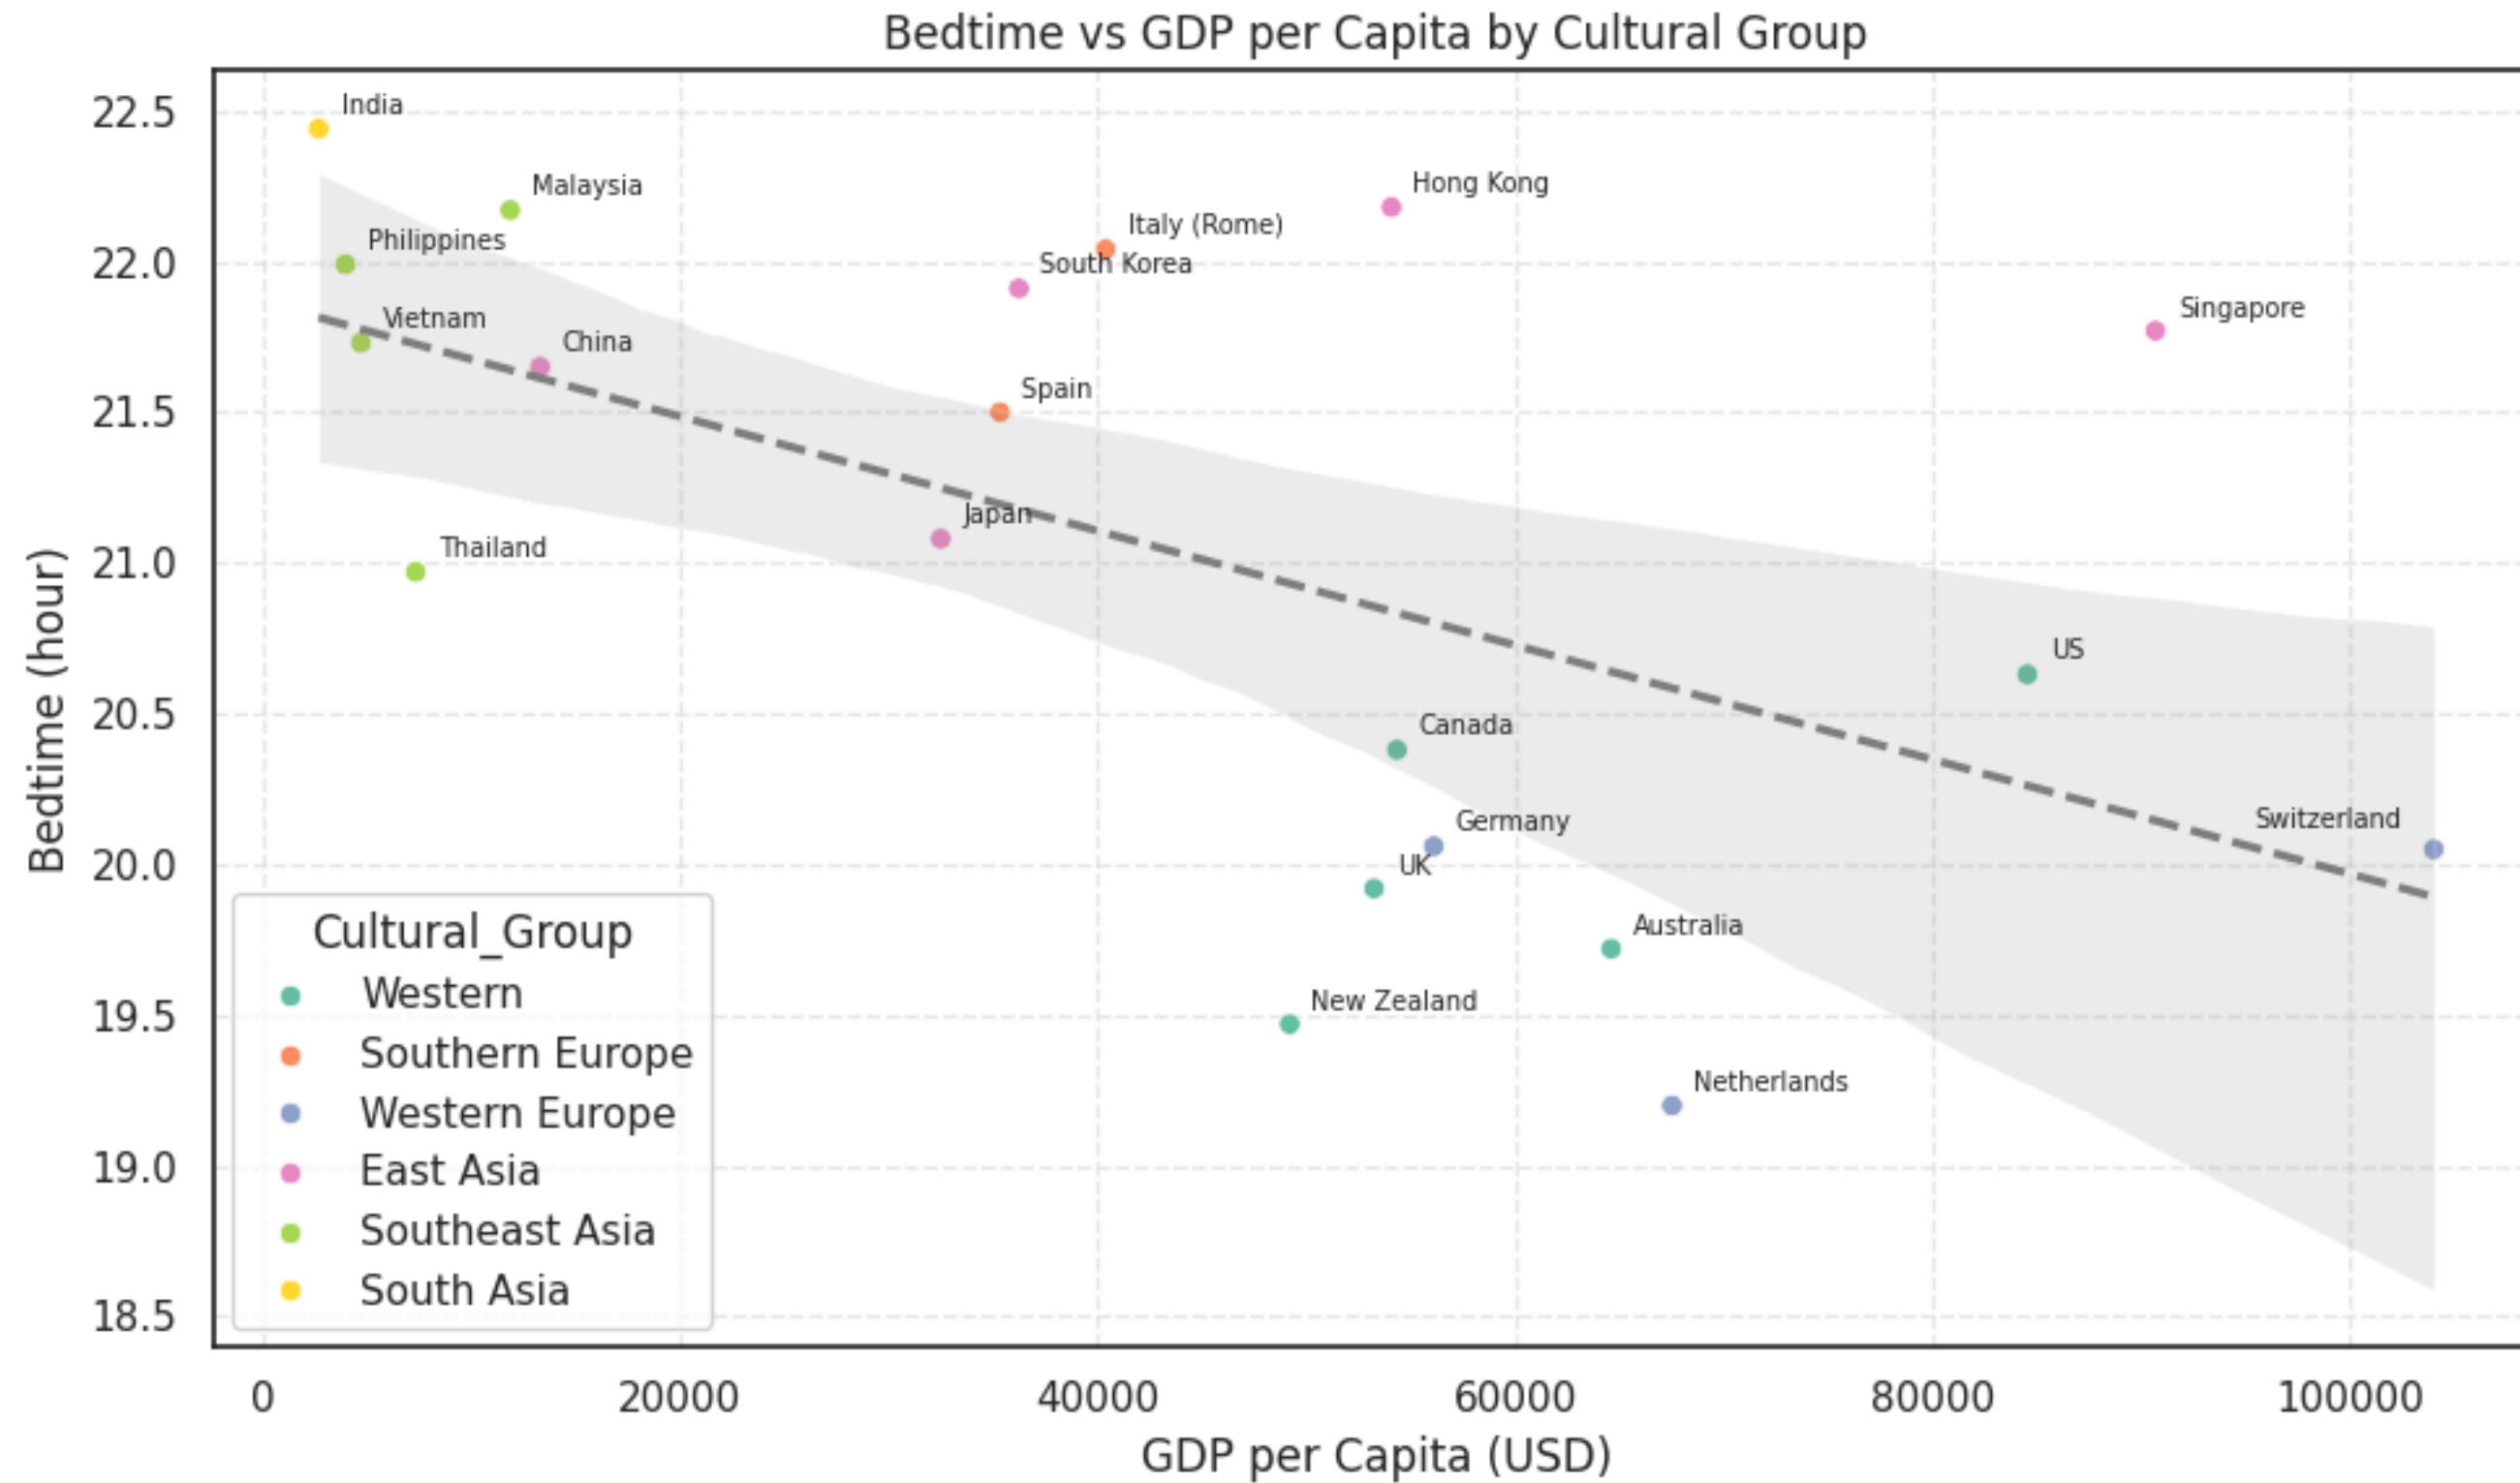

WHY DO INFANT'S BEDTIMES SIGNIFICANTLY DIFFER ACROSS COUNTRIES?

POPULATION | ECONOMICS | COLLECTIVISM

Population Density

Economic Factors

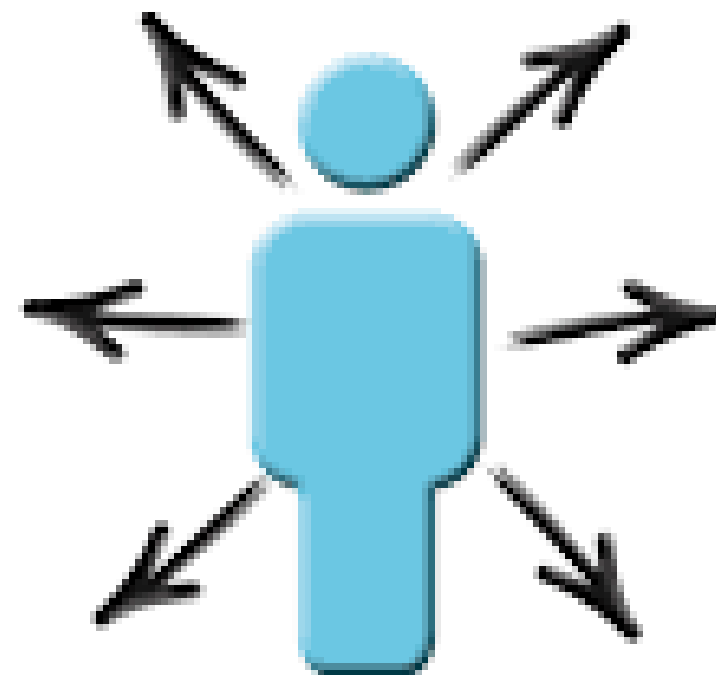

HOW PEOPLE VIEW THEMSELVES IN RELATION TO OTHERS

Individualism

Prioritize themselves

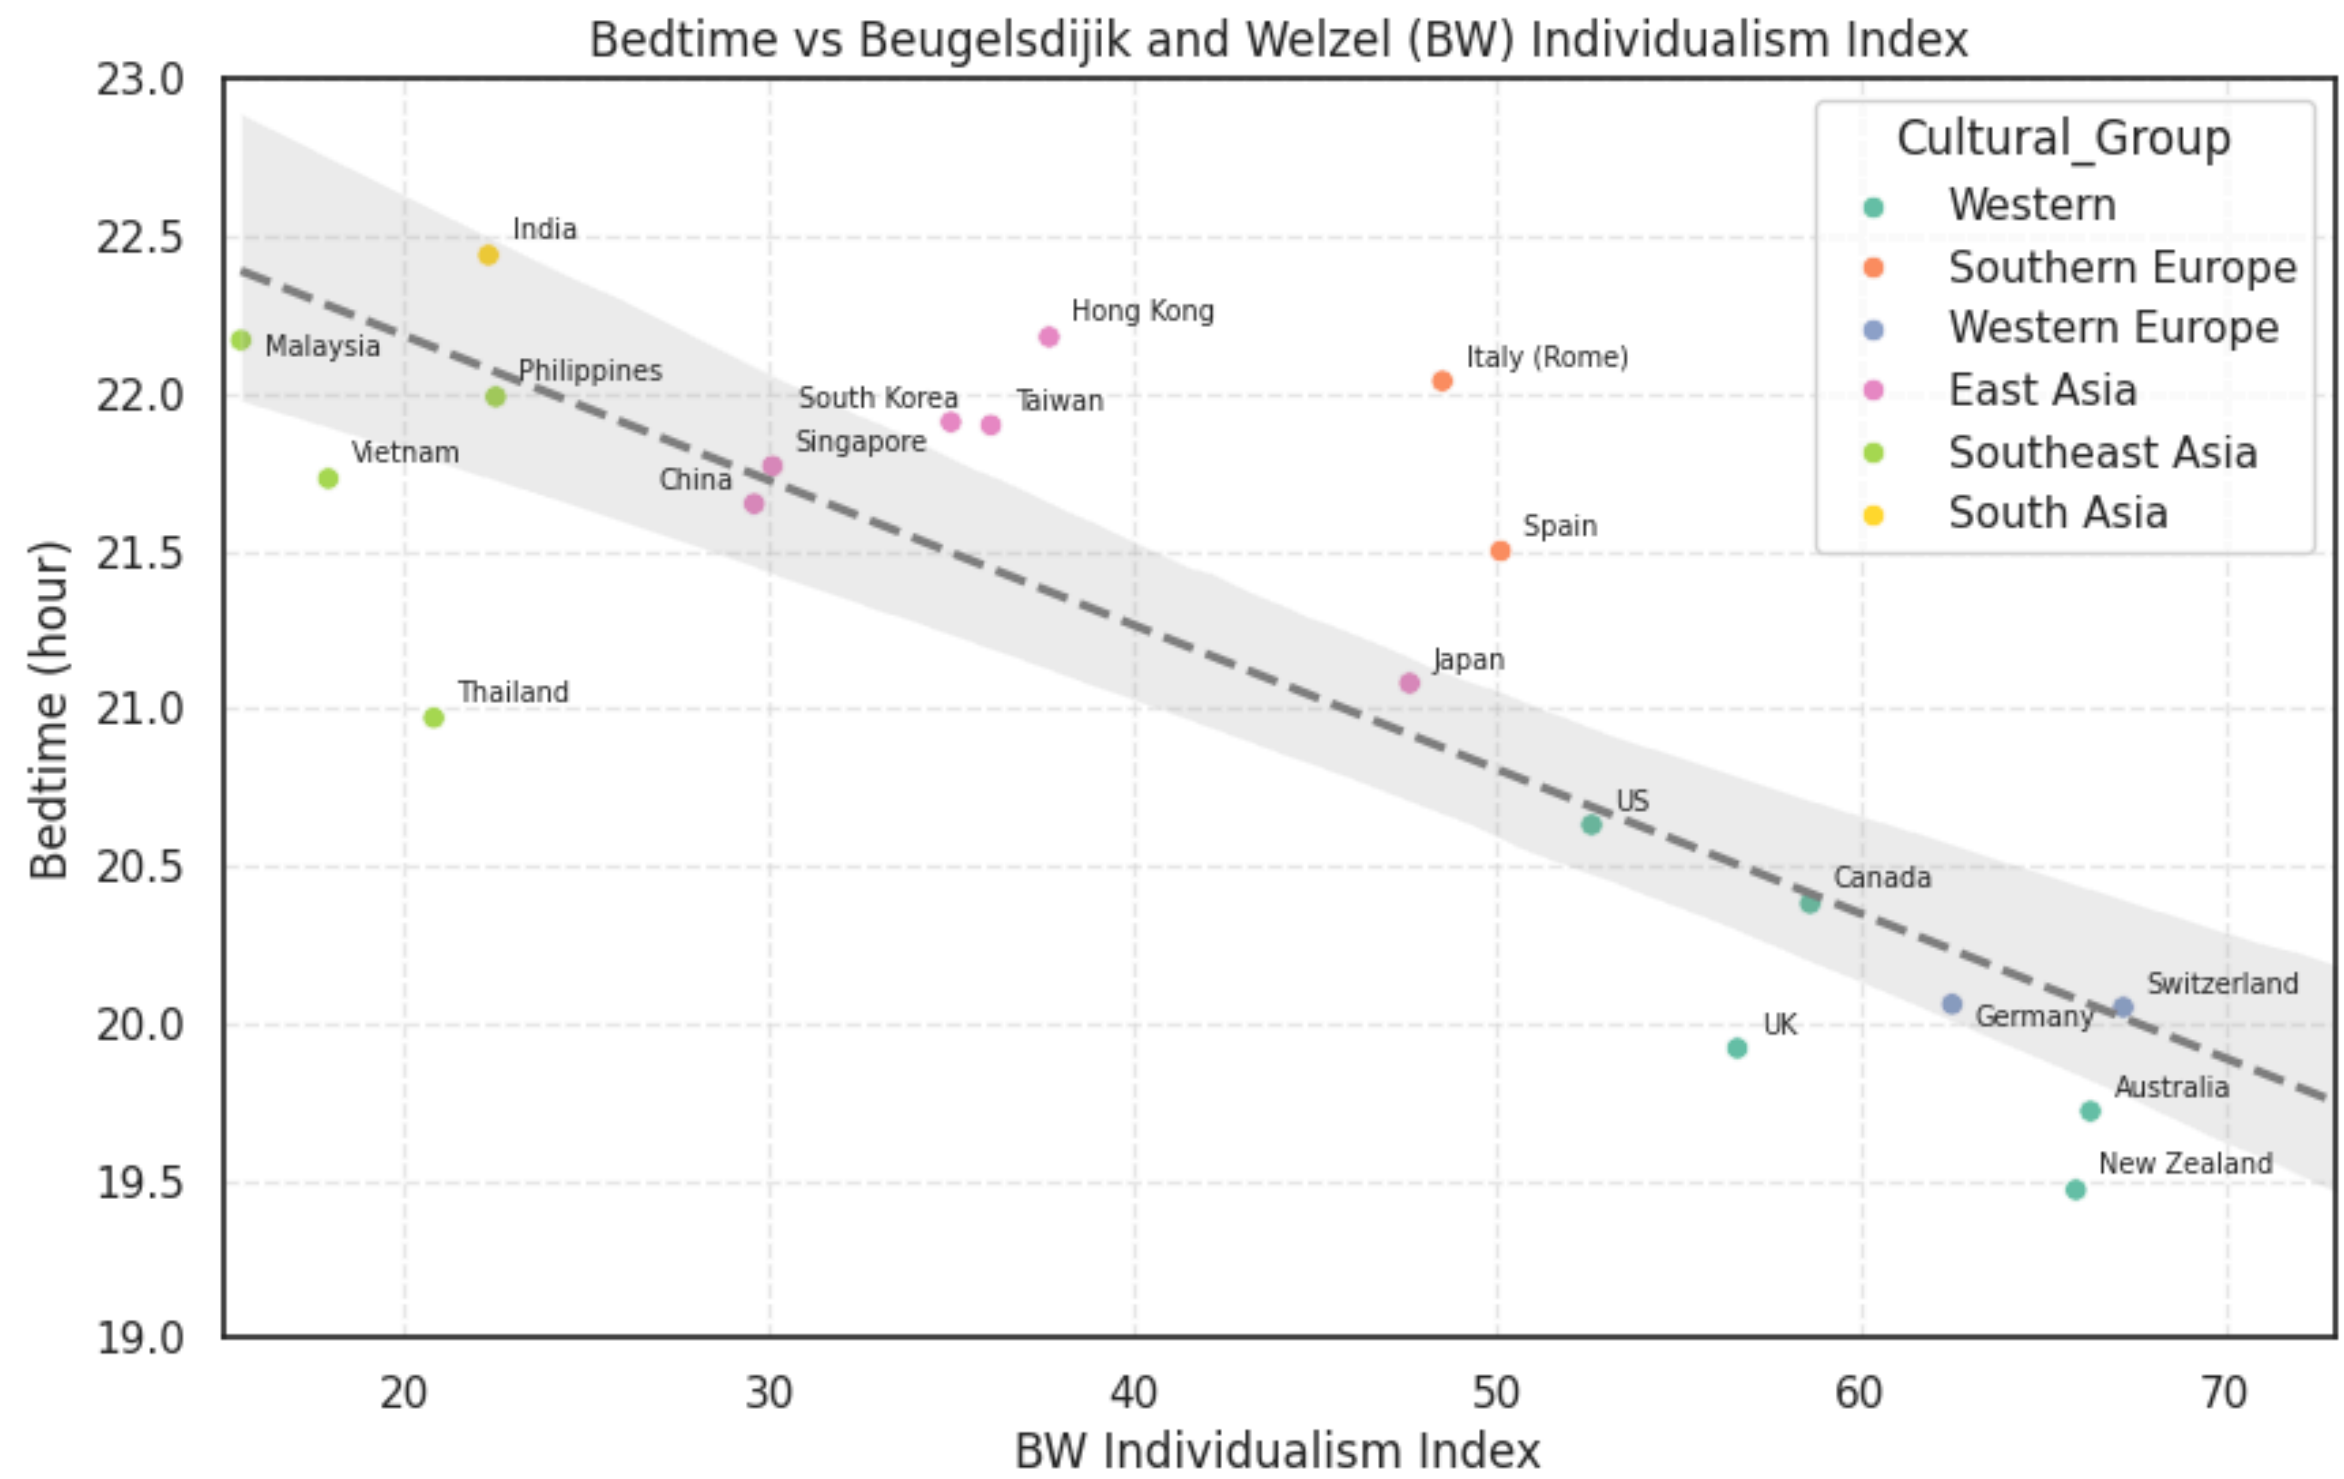

Collectivism

Prioritize others

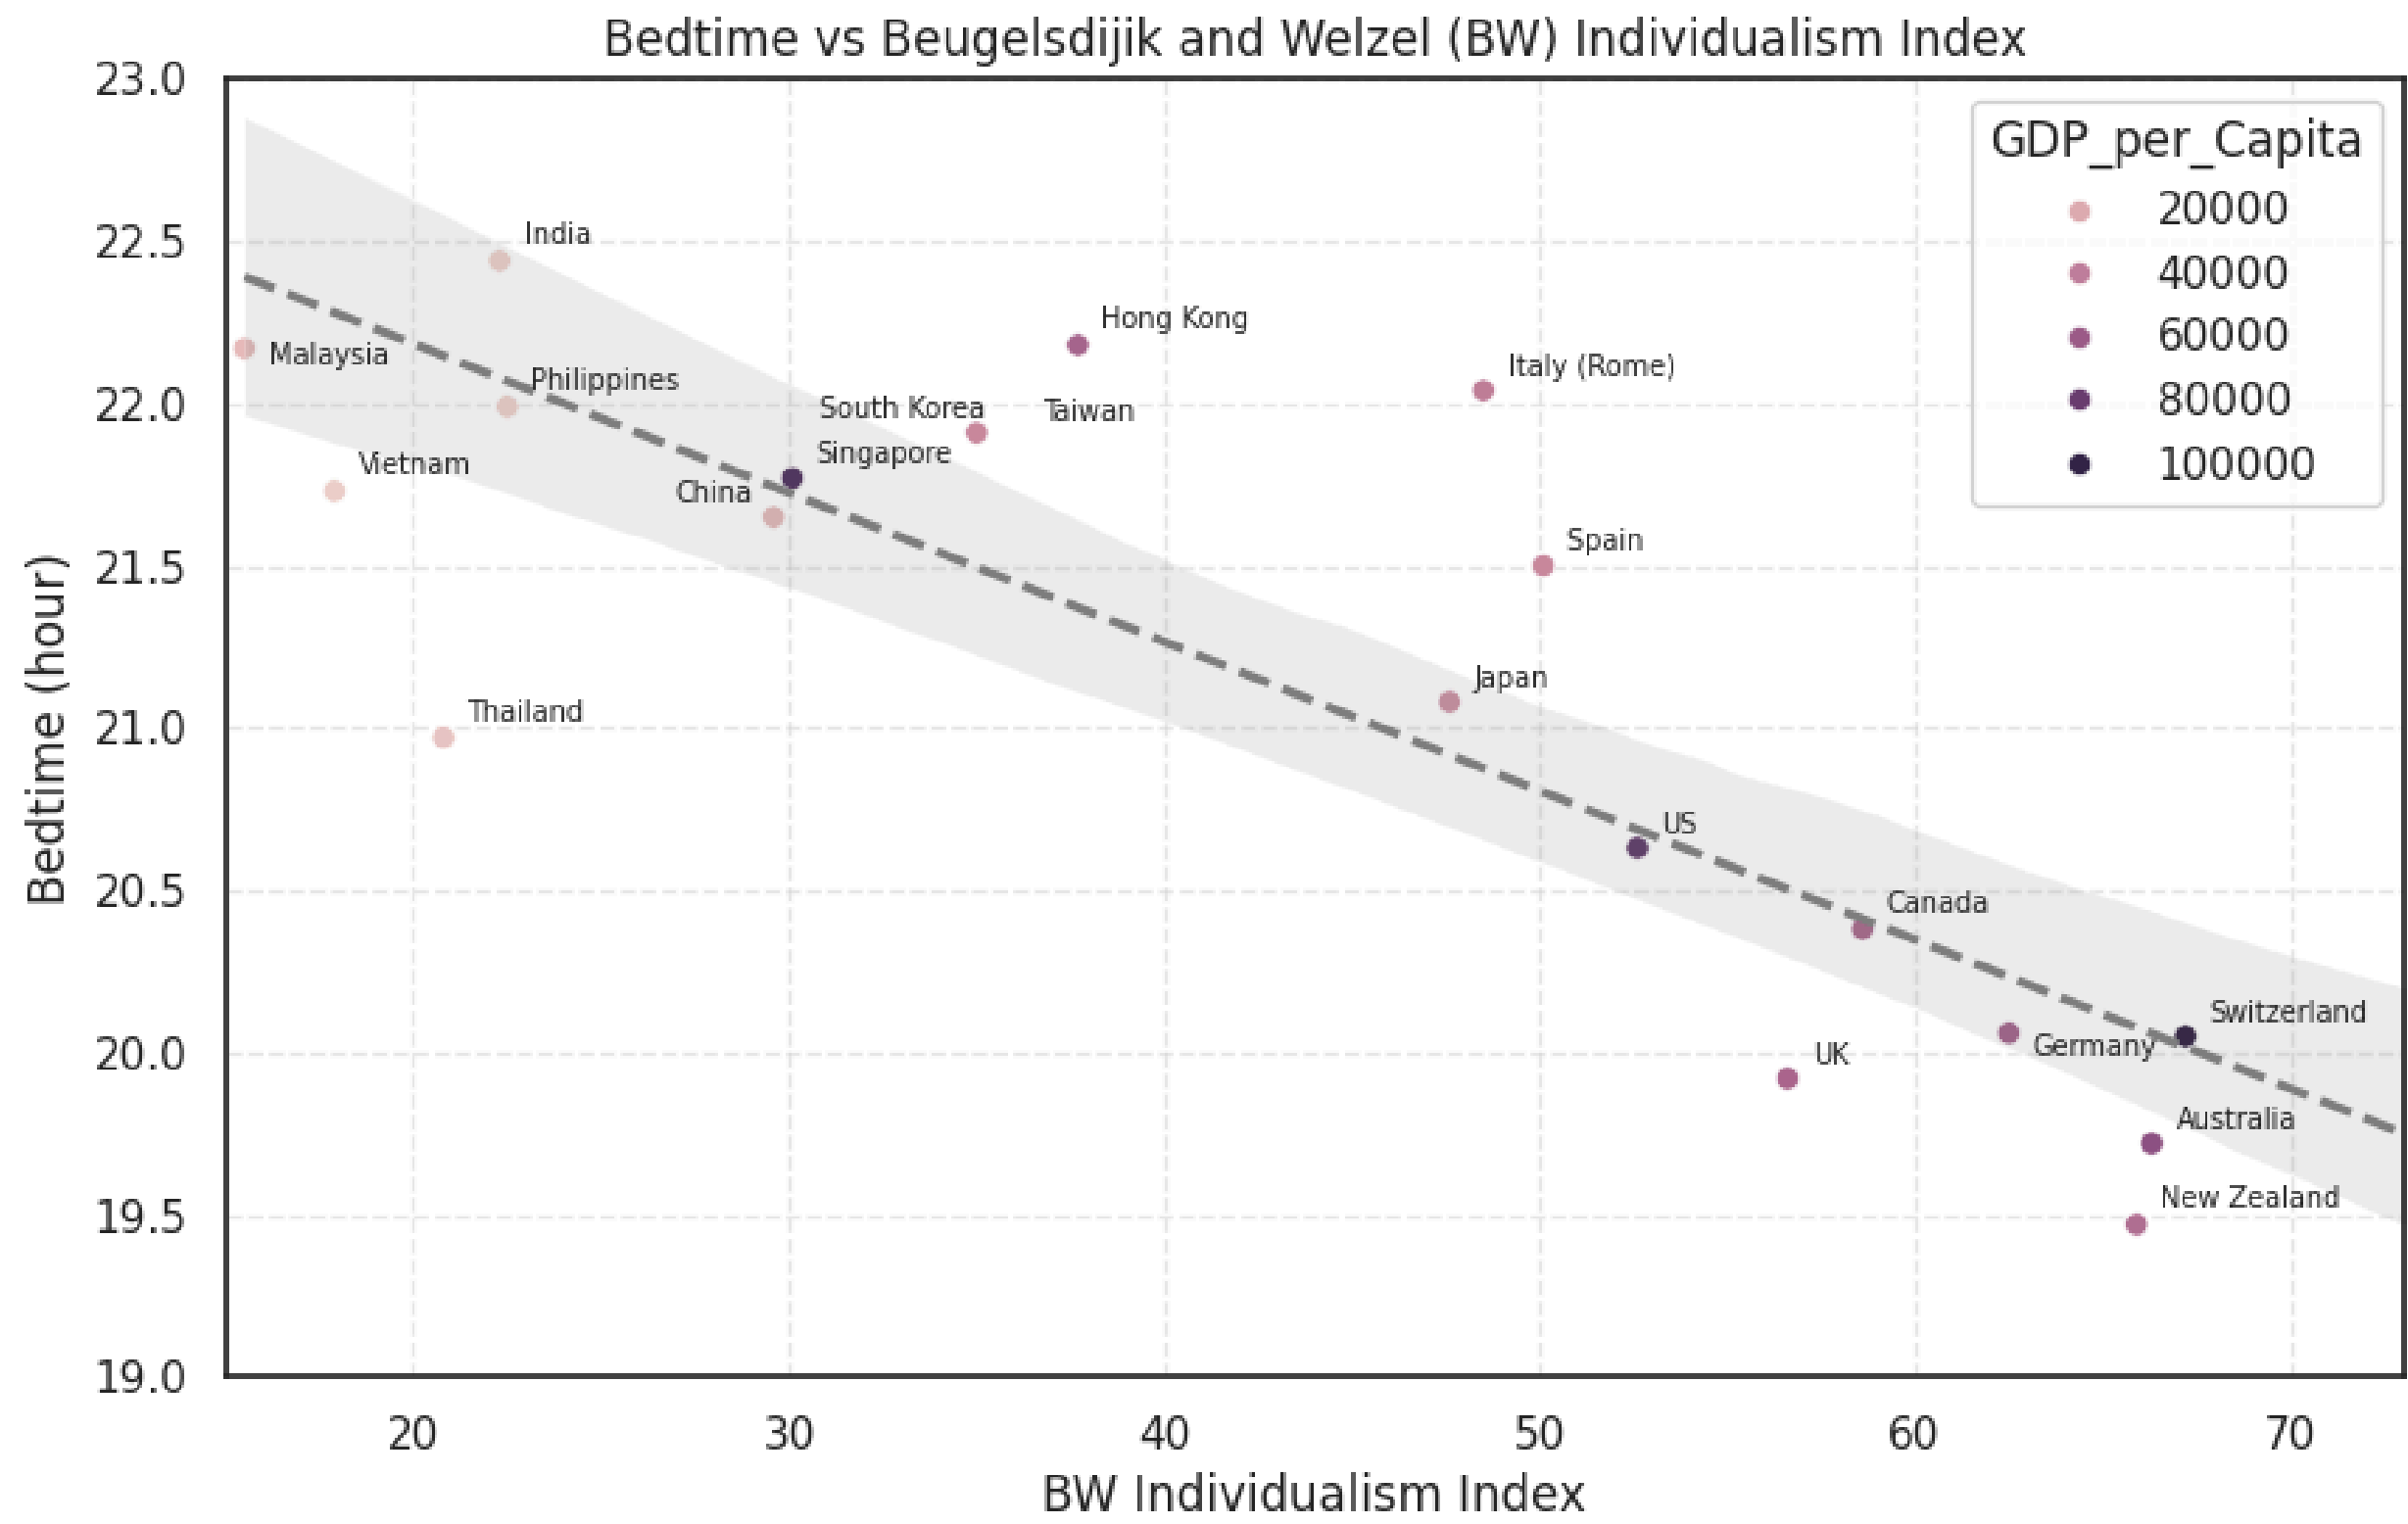

vs

Individualism vs Collectivism

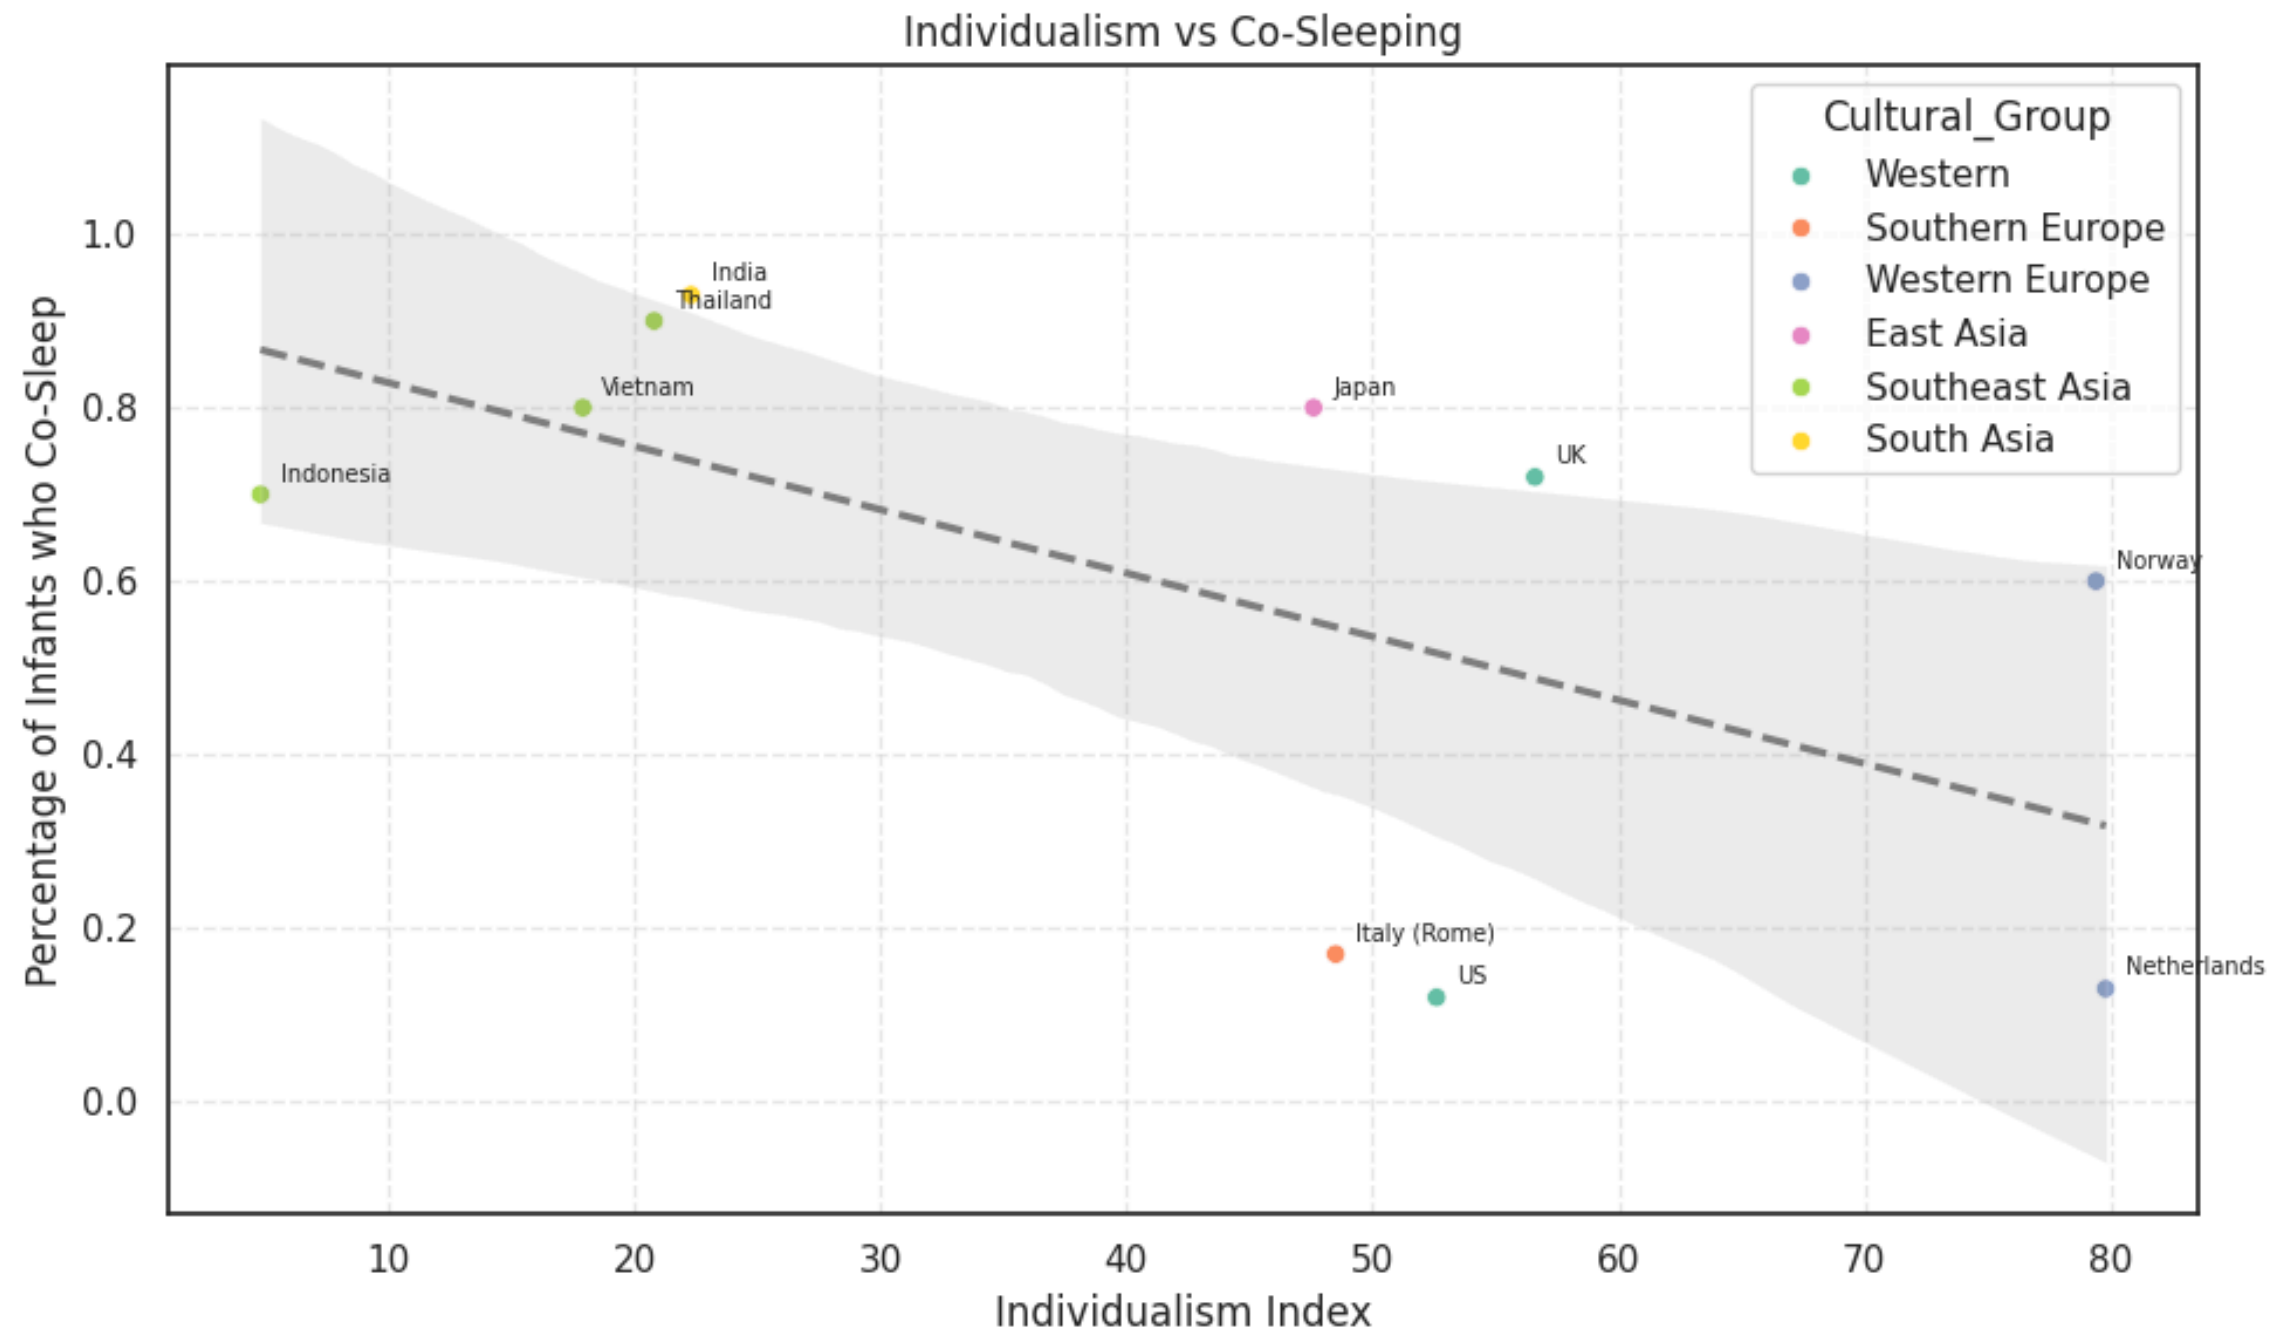

***INDIVIDUALISM SCALE GOES FROM 0-100 WITH 100 BEING THE MOST INDIVIDUALISTIC**

GDP & Individualism

Co-Sleeping & Collectivism

Some Stats:

- 93 % of Indian children (3-10 years old)
- 80% of Japanese children co-sleep
- 47% of Korean children (1-7 years old)
- 17% of Italian children (1-2 years old)
- 9.2% of U.S families
- 72 % of UK children co-sleep

Other Possibilities

Cultural Acceptance of Nap Time

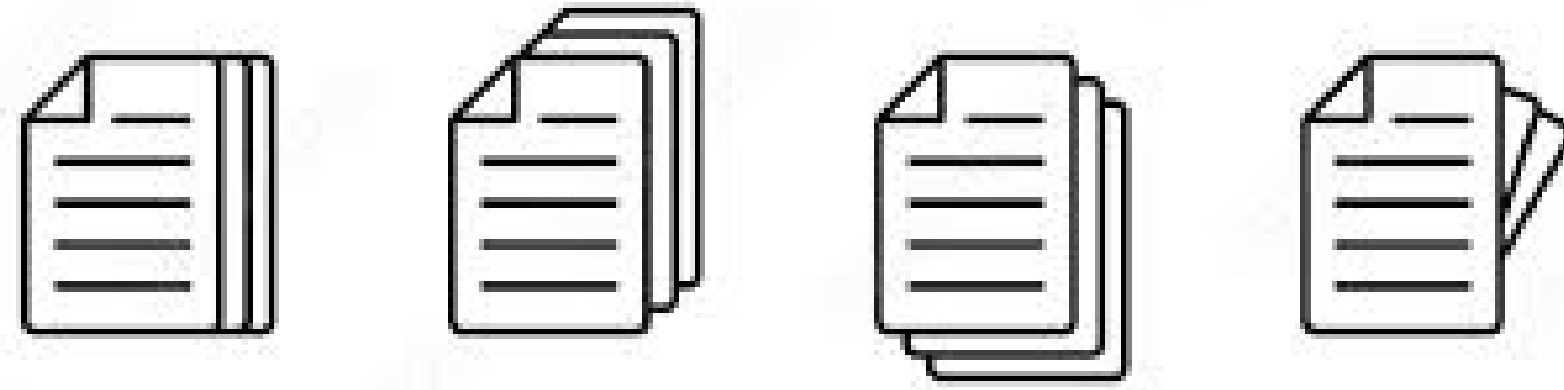

- Commonly seen in countries in Asia such as Japan, China, Vietnam

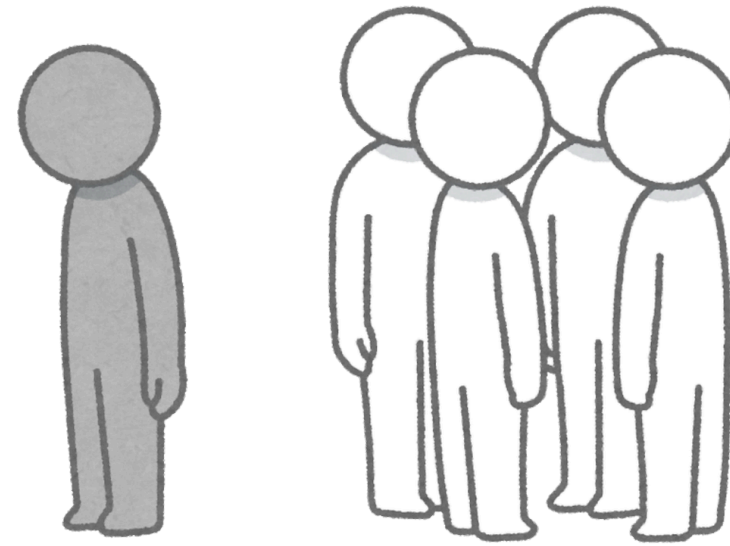

Later Dinner Times

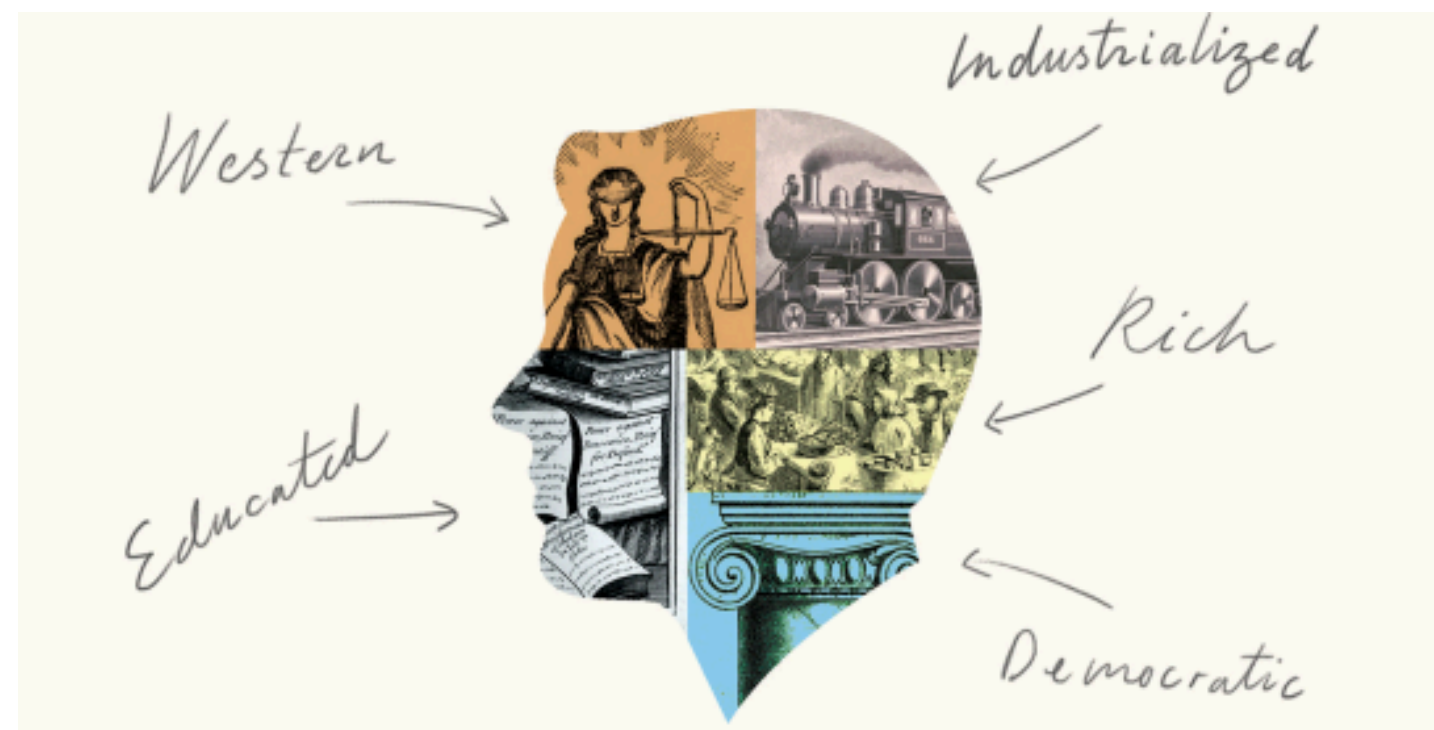

LIMITATIONS

- Multiple data sets

- Multiple individualism scales

- Limited data points

Thank You!
